### Product information concerning Per- and Polyfluoroalkyl Substances (PFAS) in HAHN products

Dear Ladies and Gentlemen,

during production of various HAHN-products, Per- and Polyfluoroalkyl Substances (PFAS) as defined in Annex XV Restriction Proposal of 22 March 2023 (Annex XV Restriction Report - see link) are not used as raw-materials.

Based on the information provided by our raw-material suppliers and knowledge of the composition of our end products, we do not add new Perfluoroalkyl and Polyfluoroalkyl (PFAS) Substances to the products listed above.

For information:

Many of these Per- and Polyfluoroalkyl Substances can be found everywhere. The inspection of HAHN products for the presence of these substances is not part of our ongoing production and quality control.

This declaration refers to the current HAHN-product range.

As HAHN is currently in the process of consulting the relevant raw-material suppliers for information on possible raw-materials with PFAS, this document may be subject to change. We recommend our clients to regularly visit our homepage ([www.hahn-trafo.com](http://www.hahn-trafo.com)) for updated documents.

Please note that our products are industrial products which may contain the following:  
Traces of unknown impurities (from the raw-materials used or from the manufacturing process itself).

In view of the many factors that may influence the processing and use of our products, this information does not exempt processors from their own examinations and tests. It is in your responsibility to ensure that any intellectual property rights, existing laws and legislation are observed.

All informations and all statements are made to the best of our knowledge and belief. They are based on sources that are considered reliable and correct at the time of publication of this document.
